

"Donate blood, save lives"

Today, June 14, marks the 20th anniversary of World Blood Donor Day.

in this context, the Ministry of Health and the National Blood Transfusion Center organize the blood donation campaign at the national level. The aim of the campaign is to sensitize society and promote the importance of voluntary and systematic blood donation, but also to develop the spirit of social responsibility.

The employees of the Material Reserve Agency joined the national campaign and donated blood and plasma.

Through our participation, we can provide a chance for a better and healthier life for those who experience medical emergencies.

Let's be in solidarity and get involved in this act of generosity that can change destinies and save lives!
