The library under the tree - The future begins with reading, and books open horizons

The Ministry of Internal Affairs joins the "Library under the tree" campaign, initiated by the Government of the Republic of Moldova, offering sets of books to libraries in schools and communities throughout the country.

Through this gesture, we want to support the development of young generations and all those who are passionate about reading, giving them access to knowledge and values ??that accompany them throughout their lives. Books are tools through which people discover the world, develop their curiosity and responsibility, preparing for the future.
